

Our Offices and Locations

We are a national and expanding business, with office locations across the UK. Each office is multi-professional, enabling our Architects, Engineers, Project Managers, Surveyors and Specialist Consultants to work flexibly to meet our client's needs.

As well as our 11 UK offices shown in orange on the map below, we also have co-located teams in Chelmsford and Salisbury. These teams support specific clients in those areas, and work from the client's premises.

This document sets out some key information about each office, and the local amenities we've found are important to our staff.
